

CARBON MANAGEMENT SERVICES

Mitchel Hanlon Consulting is a leading environmental and planning consultancy firm with a team of experienced environmental scientists dedicated to the highest professional standards.

Our team offers a broad range of technical skills combined with years of experience and extensive knowledge of policy and regulatory requirements. The team understands the importance of delivering timely and cost-effective services that are essential for project approval.

At Mitchel Hanlon Consulting, we embrace a culture of innovation, communication and teamwork. We pride ourselves on our commitment to best practice and sustainability principles.

We have an extensive range of clients in both the public and private sectors.

Our services include but are not limited to:

Carbon Management

We provide specialist services relating to the assessment of carbon management in your business. The team is experienced in the preparation of carbon footprints, essential for assessing your energy usage and greenhouse gas (GHG) emissions.

Carbon Management Plan preparation

We can prepare a Carbon Management Plan to outline where improvements can be made and how to implement GHG reduction measures.

Understanding your usage allows you to make effective decisions on energy and greenhouse gas emission reductions, saving you money in the long term.

Carbon Credits

We can provide advice and assist clients considering carbon trading for carbon sequestration and GHG abatement projects.

Let us help you maximize your opportunity to participate in the Australian carbon market.

National Greenhouse Energy Reporting System (NGERS) Reporting

Do you currently report to the National Greenhouse Energy Reporting System (NGERS)? Do you need to register due to changes in NGER legislation? Our team can provide advice on thresholds for reporting, data collection, energy balance analysis and report submissions. Let us help you deliver accurate and compliant NGER reporting and identify energy saving opportunities for your business.

For all your Carbon Management needs contact our team today.
